

Your PPE Administrator, DS Fiduciaire, Duc & Fils SA,

Anxious to ensure permanently a quality service adapted to the needs of our customers, while guaranteeing a sustainable policy, is pleased to communicate you the following information:

In order to promote a digital communication and thus to reduce the consumption of paper, we have implemented, after more than 2 years of parameterization in collaboration with our new ERP, a new software of management of PPE:

Pepsimmo (<https://www.pepsimmo.ch>)

In the short term, an online access portal will allow everyone to check, in one click, the personal situation with their PPE, the accounts report as well as to exchange documents and information in a purely digital way.

On the other hand, Pepsimmo allows a totally digital communication with the different trades, an automated management of the accounting of your building and the follow-up of its activities, while reducing the use of paper.

In conclusion, your Administrator, DS Fiduciaire, Duc & Fils SA is looking forward to collaborating with you for many years to come, in a "win-win" spirit while promoting an ecological approach.

Many thanks to you
